

Travel diary

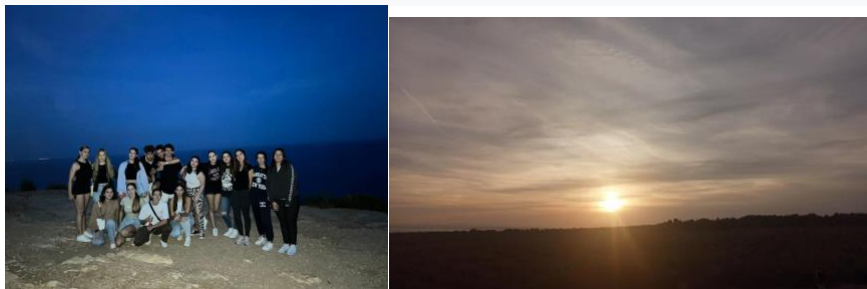

First day - 15.10.2023

The first day started by going with our parents to the airport, where they all met us to start our trip to Spain. For me it was the first time I flew by plane, I had few emotions, because I didn't know exactly what this means, but after I took off from the airport in Timisoara and landed in the airport in Valencia, Spain, I really liked it and I said that I will fly again. After a two and a half hour flight, we went to eat and then headed to the bus station to leave for Elche. The journey took three hours, but it was worth the wait, because we met our dear friends in Spain. we were welcomed with open arms by all the families, and then we each went to our new home, where we spent time with our family. there I met Paola's family, grandfather, cousins, uncle and parents, and they all have a lot of work to do. Her parents gave me paella to eat, which was very good, and then I ate fried squid. In the evening we all met, both the Spanish and the Romanian students, at a mini amusement park, where we had a great time.

The second day - 16.10.2023

The next morning I went to school, where I participated in various classes such as the Valencian language. At school they welcomed us with a portion of churros which was very good. At lunch we ate at the kindergarten together with the group of soanioli and the French. In the evening we all went together to see the sunset from the mountain in Santa Pola, and there the landscape was amazing, you could also see the sea. It was a wonderful experience to see the sunset and the sea from a mountain.

The third day - 17.10.2023

On the third day we were all three groups and visited the city of Elche. There we visited the National Palm Park, the Altamira Castle with the Lady of Elche as the symbol of the city and the cathedral, where we climbed up the tower and admired the beautiful view. In the afternoon we went by ferry to the island of Tabarca, where we spent time together and swam in the Mediterranean Sea. I also participated in a theater class, which I really liked.

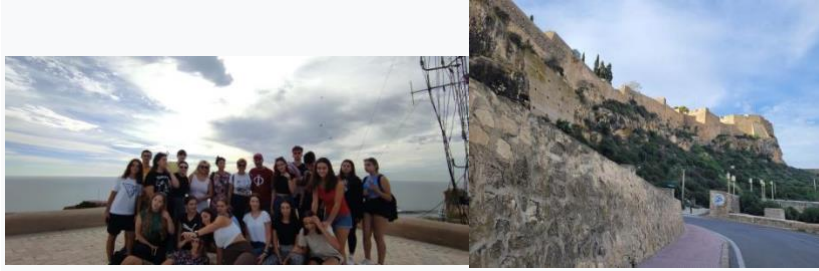

The fourth day - 18.10.2023

Wednesday morning I went to school, where I participated in various experiments in chemistry class, then we played a game in history class, where we were divided into three teams: the Romanian team, the Spanish team and the French team, our team winning every time. At lunch we ate several Spanish specialties, made by the Spanish levies themselves. Then we participated in a game organized during sports class, where we had a great time and also played volleyball and badminton. In the afternoon we went to the beach again, but this time at La Marina beach, where we swam among the waves and played volleyball again.

Fifth day - 19.10.2023

On the fifth day we went to visit the Santa Barbara castle in Alicante. It was a wonderful tour and the view from the castle platform was amazing. then we went surfing and canoeing, where we had fun and kept falling into the water because we lost our balance. I think this is an unforgettable experience.

The sixth day - 20.10.23

On Friday, I went to school in Spain for the last time, where we participated in some activities to get to know each other better, after which we said goodbye to the friends we made there at school. In the evening, our Spanish colleagues organized a surprise farewell party for us, where we had fun and spent our last evening together. Besides the surprise dinner, they surprised us with a personalized photo album for each of us.

The seventh day - 21.10.2023

On Saturday morning we headed to the bus station to leave for Valencia, where we spent the whole day visiting the oceanographer and the city center, then we returned to the accommodation in Valencia where we each told how that week seemed to us. In Spain.

The eighth day - 22.10.2023

On Sunday we returned home to our families, whom we missed very much, the flight being a relaxing one and without any accidents. This experience was a wonderful one and I am very happy that I could take part in it. If someone asked me if I would participate in such projects again, I would say yes without hesitation.
